

ALPHA II | CodeWizard

In today's healthcare environment, complex coding and billing rules drive accurate reimbursement. Alpha II simplifies this complexity for software developers by providing CodeWizard, the most advanced solution for handling coding and compliance for the revenue cycle.

THE
DEVELOPER'S
SOLUTION DESIGNED
TO **IMPROVE**
THE REVENUE
CYCLE

CodeWizard allows practice management, EHR and health information management system developers to bring sophisticated application functionality to market more quickly with less need for complicated testing, database management and continual research and development.

Easy, Flexible Implementation

CodeWizard can be easily implemented through cloud-based web services that require no installation or in a local client/server environment. The software embeds easily into any practice management system, EHR or hospital information management system via a quick interface or through in-depth integration.

The modular design is powerful enough for the biggest names in healthcare and flexible enough for smaller, specialized providers.

Outstanding Support

Alpha II provides outstanding development support to all partners—from thorough orientation and documentation of CodeWizard's robust features to workflow considerations and guidance throughout the implementation process.

Once implementation is achieved, the Alpha II helpdesk is available and staffed with experts who can assist with both technical and application support.

Some of CodeWizard's Features:

- **Data content and rules engine** to provide **coding and billing edits** for improved accuracy.
- **Medical necessity** on all procedure and diagnosis code combinations that trigger **ABN Generation**.
- Quick and easy **code search** allows correct codes to be found by keyword, site, or clinical acronyms.
- **E/M Generation** is based on history and exam elements, as well as risk and diagnosis acuity intelligence to determine accurate medical decision making.

"Alpha II is great to partner with. Their approach to allowing us to preserve our user interface and our workflows while using their edits, their rules and their richness behind the scenes is absolutely perfect. It is a superb differentiator and an amazing asset for us, and it is a part of a demonstration that we use to get deals done all the time."
