## Presented Challenges

A large clearinghouse with expertise in front-end editing and claims processing needed to expand its platform to include clinical content with coding and billing edits. The clearinghouse did not want to develop and host the content. Its ideal partner, as a coding expert, would develop, host, and maintain clinical content—allowing the clearinghouse to focus on its own strengths while providing a more robust product. As a customer-focused platform, the clearinghouse was also looking for an integrated solution to make pricing and performance easier for its providers.

## How We <br> Helped

With our hosted, SaaS-based content platform, Alpha II was able to offer a fully integrated solution. As a result, the clearinghouse now has a robust clinical coding and editing solution, creating cost savings and efficiencies for its providers. Alpha Il's specialty is its focus on clinical content, which is updated in near realtime, while other clearinghouse solutions maintain their own content quarterly.

## Resulting <br> Success

\$6.2B
total billed claims

\$514M
total billed errors* identified
8.22\%
total services billed with errors

The partnership continues to contribute to denial prevention, improved revenue integrity and new business portfolio growth. The client secured two large PMS solutions since the previous partners couldn't match Alpha Il's level of seamless editing.
