saved in potential
revenue loss*

400M+

transactions processed
annually*

“ ClaimStaker has been instrumental in helping our clients submit clean claims. We integrated editing into our EHR and PM system, giving our clients the chance to address issues early in the process. Edit configurability and custom edits allow providers to enable edits that impact their claims, ensuring even the most obscure payer rules get billed correctly. ”

Todd Frischknecht, President / CEO, PCIS GOLD

What is ClaimStaker®

ClaimStaker is much more than a traditional claim scrubber. As a SaaS-based clinical claim scrubber solution, ClaimStaker enables a proactive approach to denial avoidance. Retain your hard-earned revenue instead of spending time and money on traditional denial management methods.

Three Steps to Seamless Implementation

- 1 Register your practice
- 2 Review your edit configurations
- 3 Begin scrubbing your claim and encounter data

ClaimStaker® Key Differentiators

- Incorporates full suite of professional, institutional, and quality reporting edits
- Designed to deploy across multiple revenue cycle workflows through seamless integration into any EMR or PM platform
- Timely rules engine updates from our team of clinicians, certified coders, software engineers, EDI specialists, and medical managers
- Broad edits across full continuum of care including ambulatory, acute, post-acute with specialty and sub-specialty edits
- Preset specialty edit configurations allow for immediate use
- Customize configurations using existing edits or create custom edits with a simple “edit wizard” tool
