

ZERO Balance Review

90%

of denied claims are preventable

5-10%

of physician claims are rejected by the payer

\$25

average cost to rework a claim

Risk-Free Revenue Recovery

What is Zero Balance Review

For providers who render services to Medicare patients, reworking denied, rejected, and underpaid claims can be time-consuming and costly. Alpha II's Zero Balance Review conducts an in-depth analysis of your remittance data to highlight impactful points of revenue loss. Using our revenue intelligence platform, our team will identify underpayments, prioritize high-dollar opportunities, and engage your team in denial avoidance. Zero Balance Review's risk-free contingency pricing enables proactive revenue recovery without upfront costs.

Rely on our coding and billing experts to identify common errors affecting your revenue cycle such as:

- Missing, inaccurate, or duplicate claim information
- Unpaid line items on processed claims
- Medical necessity reviews
- CMS rule changes
- Missing or incorrect modifier usage
- Fee schedule updates
- And more

Five Steps to Revenue Recovery

- 1 Load claim and remittance data
- 2 Review results from analysis
- 3 Develop denial avoidance action plan
- 4 Recover lost revenue
- 5 Prevent further revenue loss
